

UX-UI Challenge

Redesign: Air India Homepage

Designer: **Nishanth Arya**

Challenge 1

1) REDESIGN USING EXISTING BRAND GUIDELINES (Logo & Color only)

- Please note that the current UI only contains indicative elements that are open for improvement.
- To make a fresh and futuristic mock up, giving Air India's brand a more appealing feel.

Can be more focused on

- Landing page UX problems & solution recommendations
- Incorporating present use cases and supporting design with UX concept document
- Visual look and feel and ideation
- Latest/Trendy UI Patterns
- Break the monotony
- Typography (you can use any fonts. Do share your font selection rationale)
- Color balance
- Precision in detailing

2) PROTOTYPE (Invision / Marvel / Flinto)

Interactions are in trend these days. It's a good to have if you can present in a prototype. (Not a must-have.)

Few more things before you proceed

Feel free to use whatever tools & processes you need, but make sure the response is your own.

Provide enough context behind your designs and thought process, in whatever medium you are comfortable with (invision/PDF/PPT), to get your point across.

No matter how long or how many slides you take, remember to have fun and do not get restricted with the provided wire frame. You are here to explore beyond the boundaries of the wires.

About The Project

This is a Complete redesign of the Air India website. This website is designed to create or plan our trips in much easier way ahead. Now we can book our own tickets from anywhere around the world! Find the perfect flights, discover things to do at the new locations and get helpful trip reminders right when we need them.

Accessibility Test Present Website

<https://ace.accessibe.com>

Non-compliant
You have a long way to go to achieve WCAG 2.1 compliance.

Wag 2.1 compliance.

Web Content Accessibility Guidelines (Wag) 2 is developed through the W3C processing cooperation with individuals and organizations around the world

Clickables

SCORE: 55

- ✗ Elements with button functionality should be tagged for assistive technology
- ⚠ Buttons cannot be empty
- ✓ Links cannot be empty
- ✗ Links that open in new tabs/windows should be tagged for assistive technology

Orientation

NEUTRAL

- ✗ Interactive elements should be navigable using the keyboard
- ✗ Keyboard focus should have a noticeable outline
- Active popups should be tagged for assistive technology
- ✗ Every page should include hidden links that allow skipping blocks
- Manipulatively hidden interactive elements should be excluded from assistive technology
- Manipulatively hidden interactive elements should be excluded from tabindex

Menus

NEUTRAL

- ✗ Menus should be tagged for assistive technology
- ✗ Menu dropdowns should be tagged for assistive technology
- ✗ Dropdown expanded/collapsed state should be represented in the code

Graphics

SCORE: 37

- ✗ Objects and embedded text of images should be described for assistive technology
- ✗ Background images behaving as standard images should be tagged and described
- ⚠ Non-functional icons/spacers should be excluded from assistive technology
- Figure elements should have text or be excluded from assistive technology
- Image map areas should be described for assistive technology
- Tracker images (pixels) should be excluded from assistive technology

Titles

SCORE: 25

- ✗ Every page should include a single H1 title
- ✓ Titles cannot be empty
- ✗ Titles built as text tags should be labeled as headings for assistive technology
- ✗ Titles should have a consistent hierarchy

Forms

SCORE: 60

- ⚠ Form fields should be properly labeled
- Form fields should not have duplicate ID selectors
- Required form fields should be tagged for assistive technology
- Validation status of form fields should be represented in the code
- ✗ Incorrect use of aria-describedby/labeledby
- ✓ All forms have associated submission buttons
- Search forms should be tagged for assistive technology

Document

SCORE: 50

- ✓ The HEAD element should include a title element with the name of the page
- ✓ The HTML element should include a proper "lang" attribute
- ✗ Meta viewport allows display scaling of at least 200%
- ✗ Page landmarks should be tagged and described for assistive technology

Readability

SCORE: 46

- ✗ Font sizes should be large enough to be readable
- ✓ Letter spacing should be wide enough to be readable
- ✗ Foreground and background colors have sufficient contrast

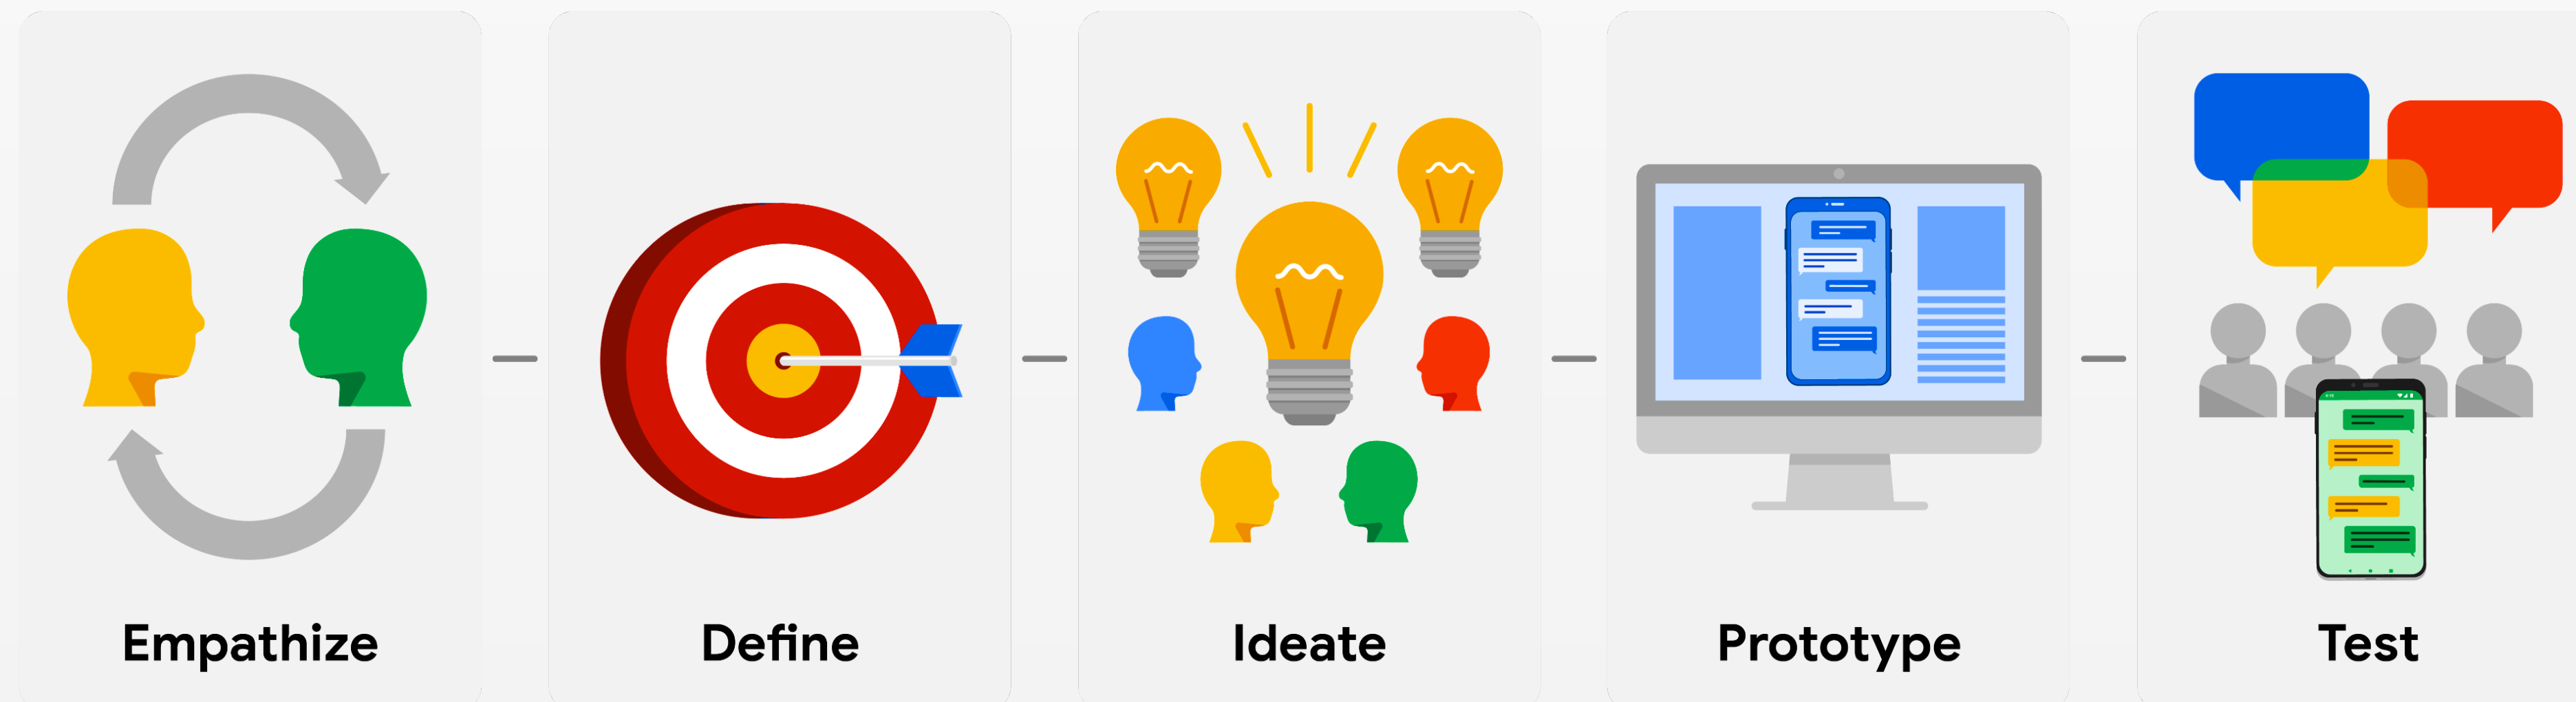

Tables

NEUTRAL

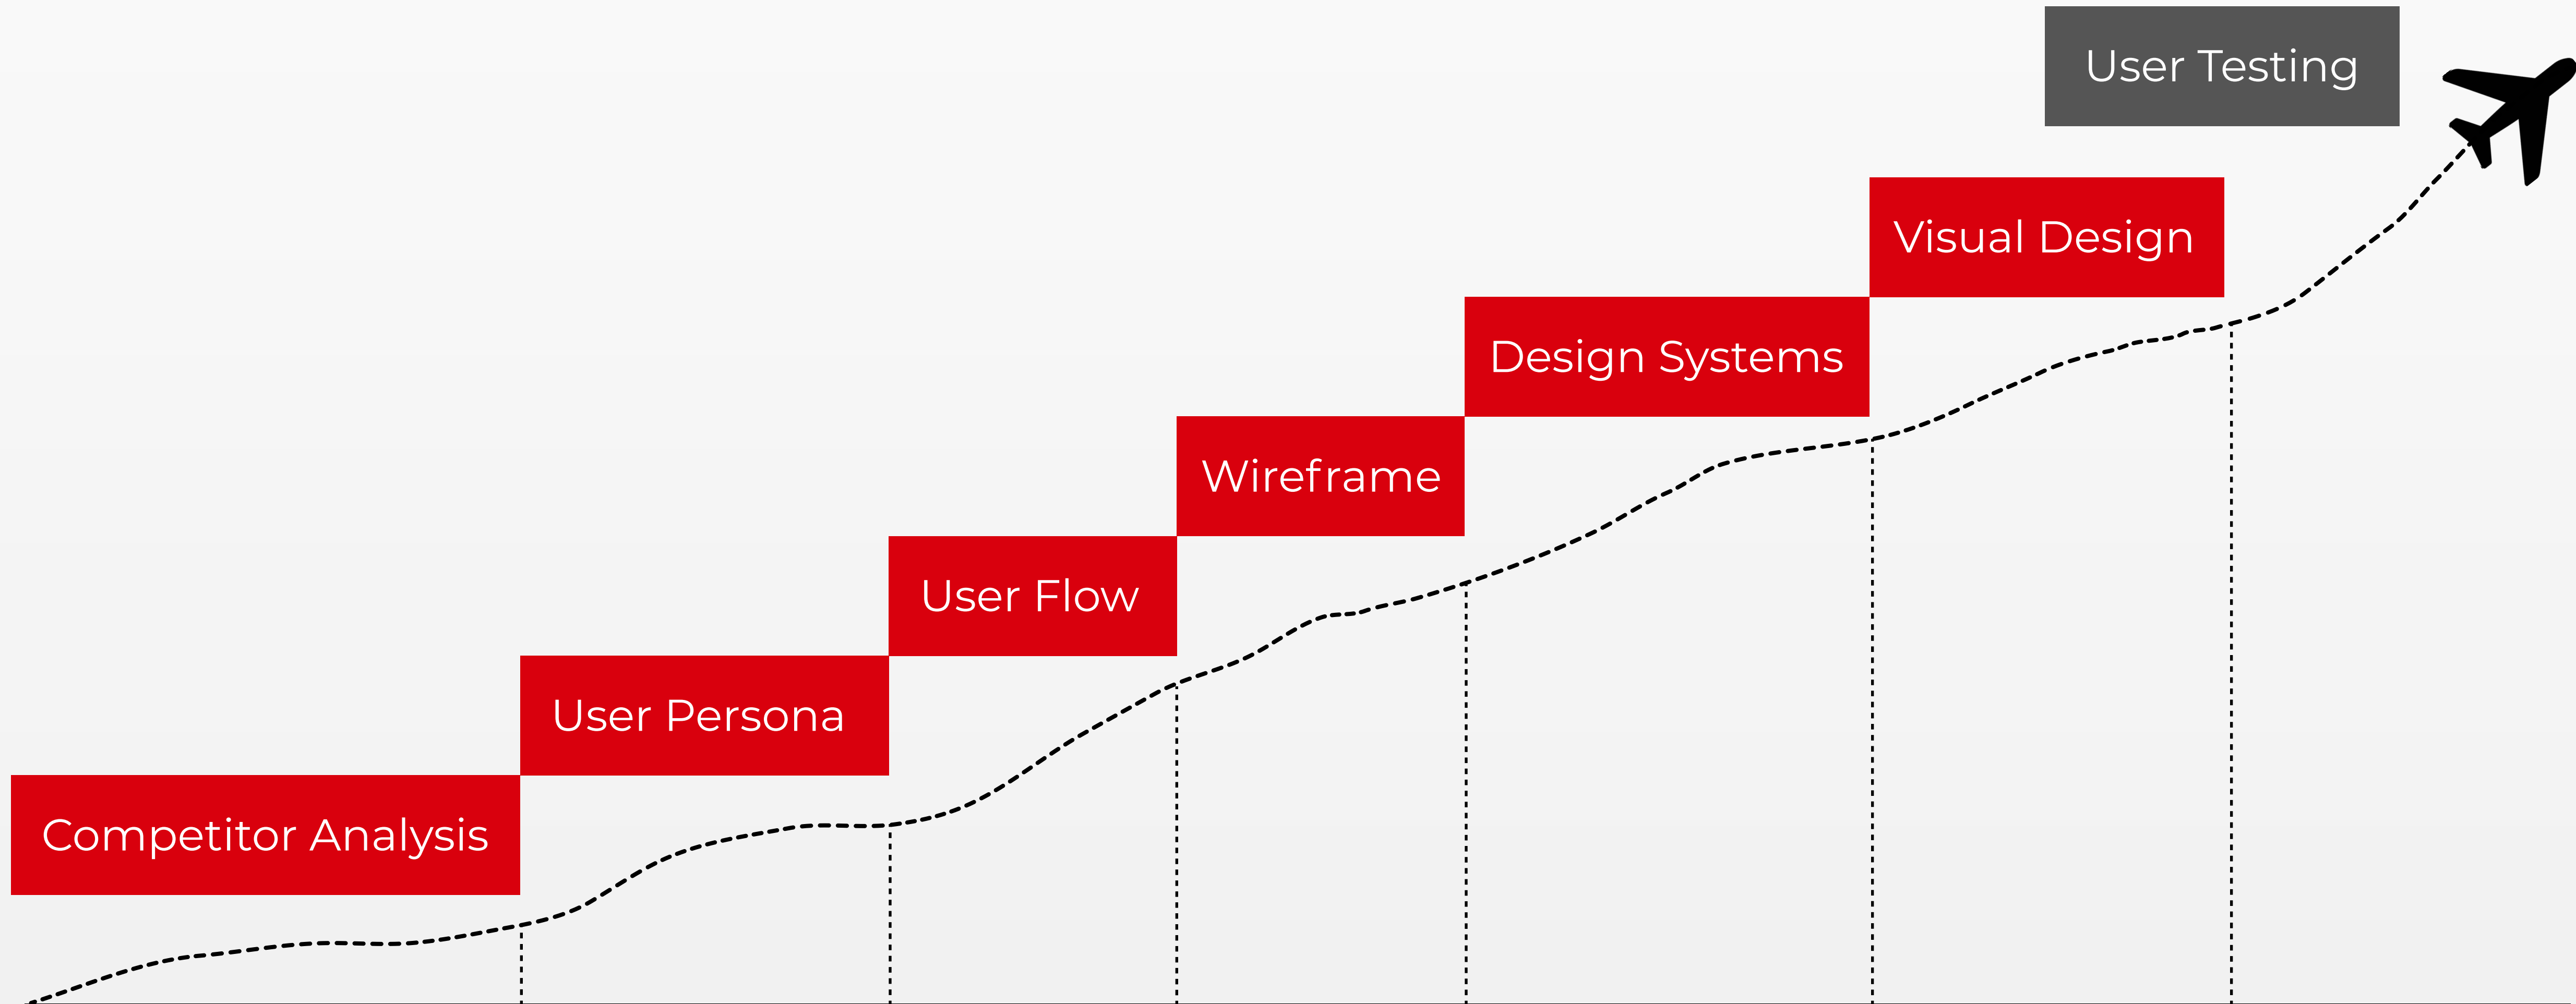

- Tables used for building layouts should be tagged as presentation
- Avoid nesting tables or exclude their role from assistive technology
- Headless tables should have fallback rows for assistive technology

Our Design Process

I have followed UX process to Find the best solutions for our Client. The clear structure and sequences of task helped us deliver this project in the most effective way.

Why I used Montserrat Font?

The old posters and signs in the traditional neighborhood of Buenos Aires called Montserrat inspired me to design a typeface that rescues the beauty of urban typography from the first half of the twentieth century. The goal is to rescue what is in Montserrat and set it free, under a free, Libre and open source license, the SIL Open Font License.

As urban development changes this place, it will never return to its original form and loses forever the designs that are so special and unique. To draw the letters, I rely on examples of lettering in the urban space. Each selected example produces its own variants in length, width and height proportions, each adding to the Montserrat family. The old topographies and canopies are irretrievable when they are replaced.
