

Gaming User

Homepage Discovery & Framing

This presentation encompasses the discovery and Framing process, to understand behaviour of Gaming users on homepage

Designer
Nishanth Arya N S

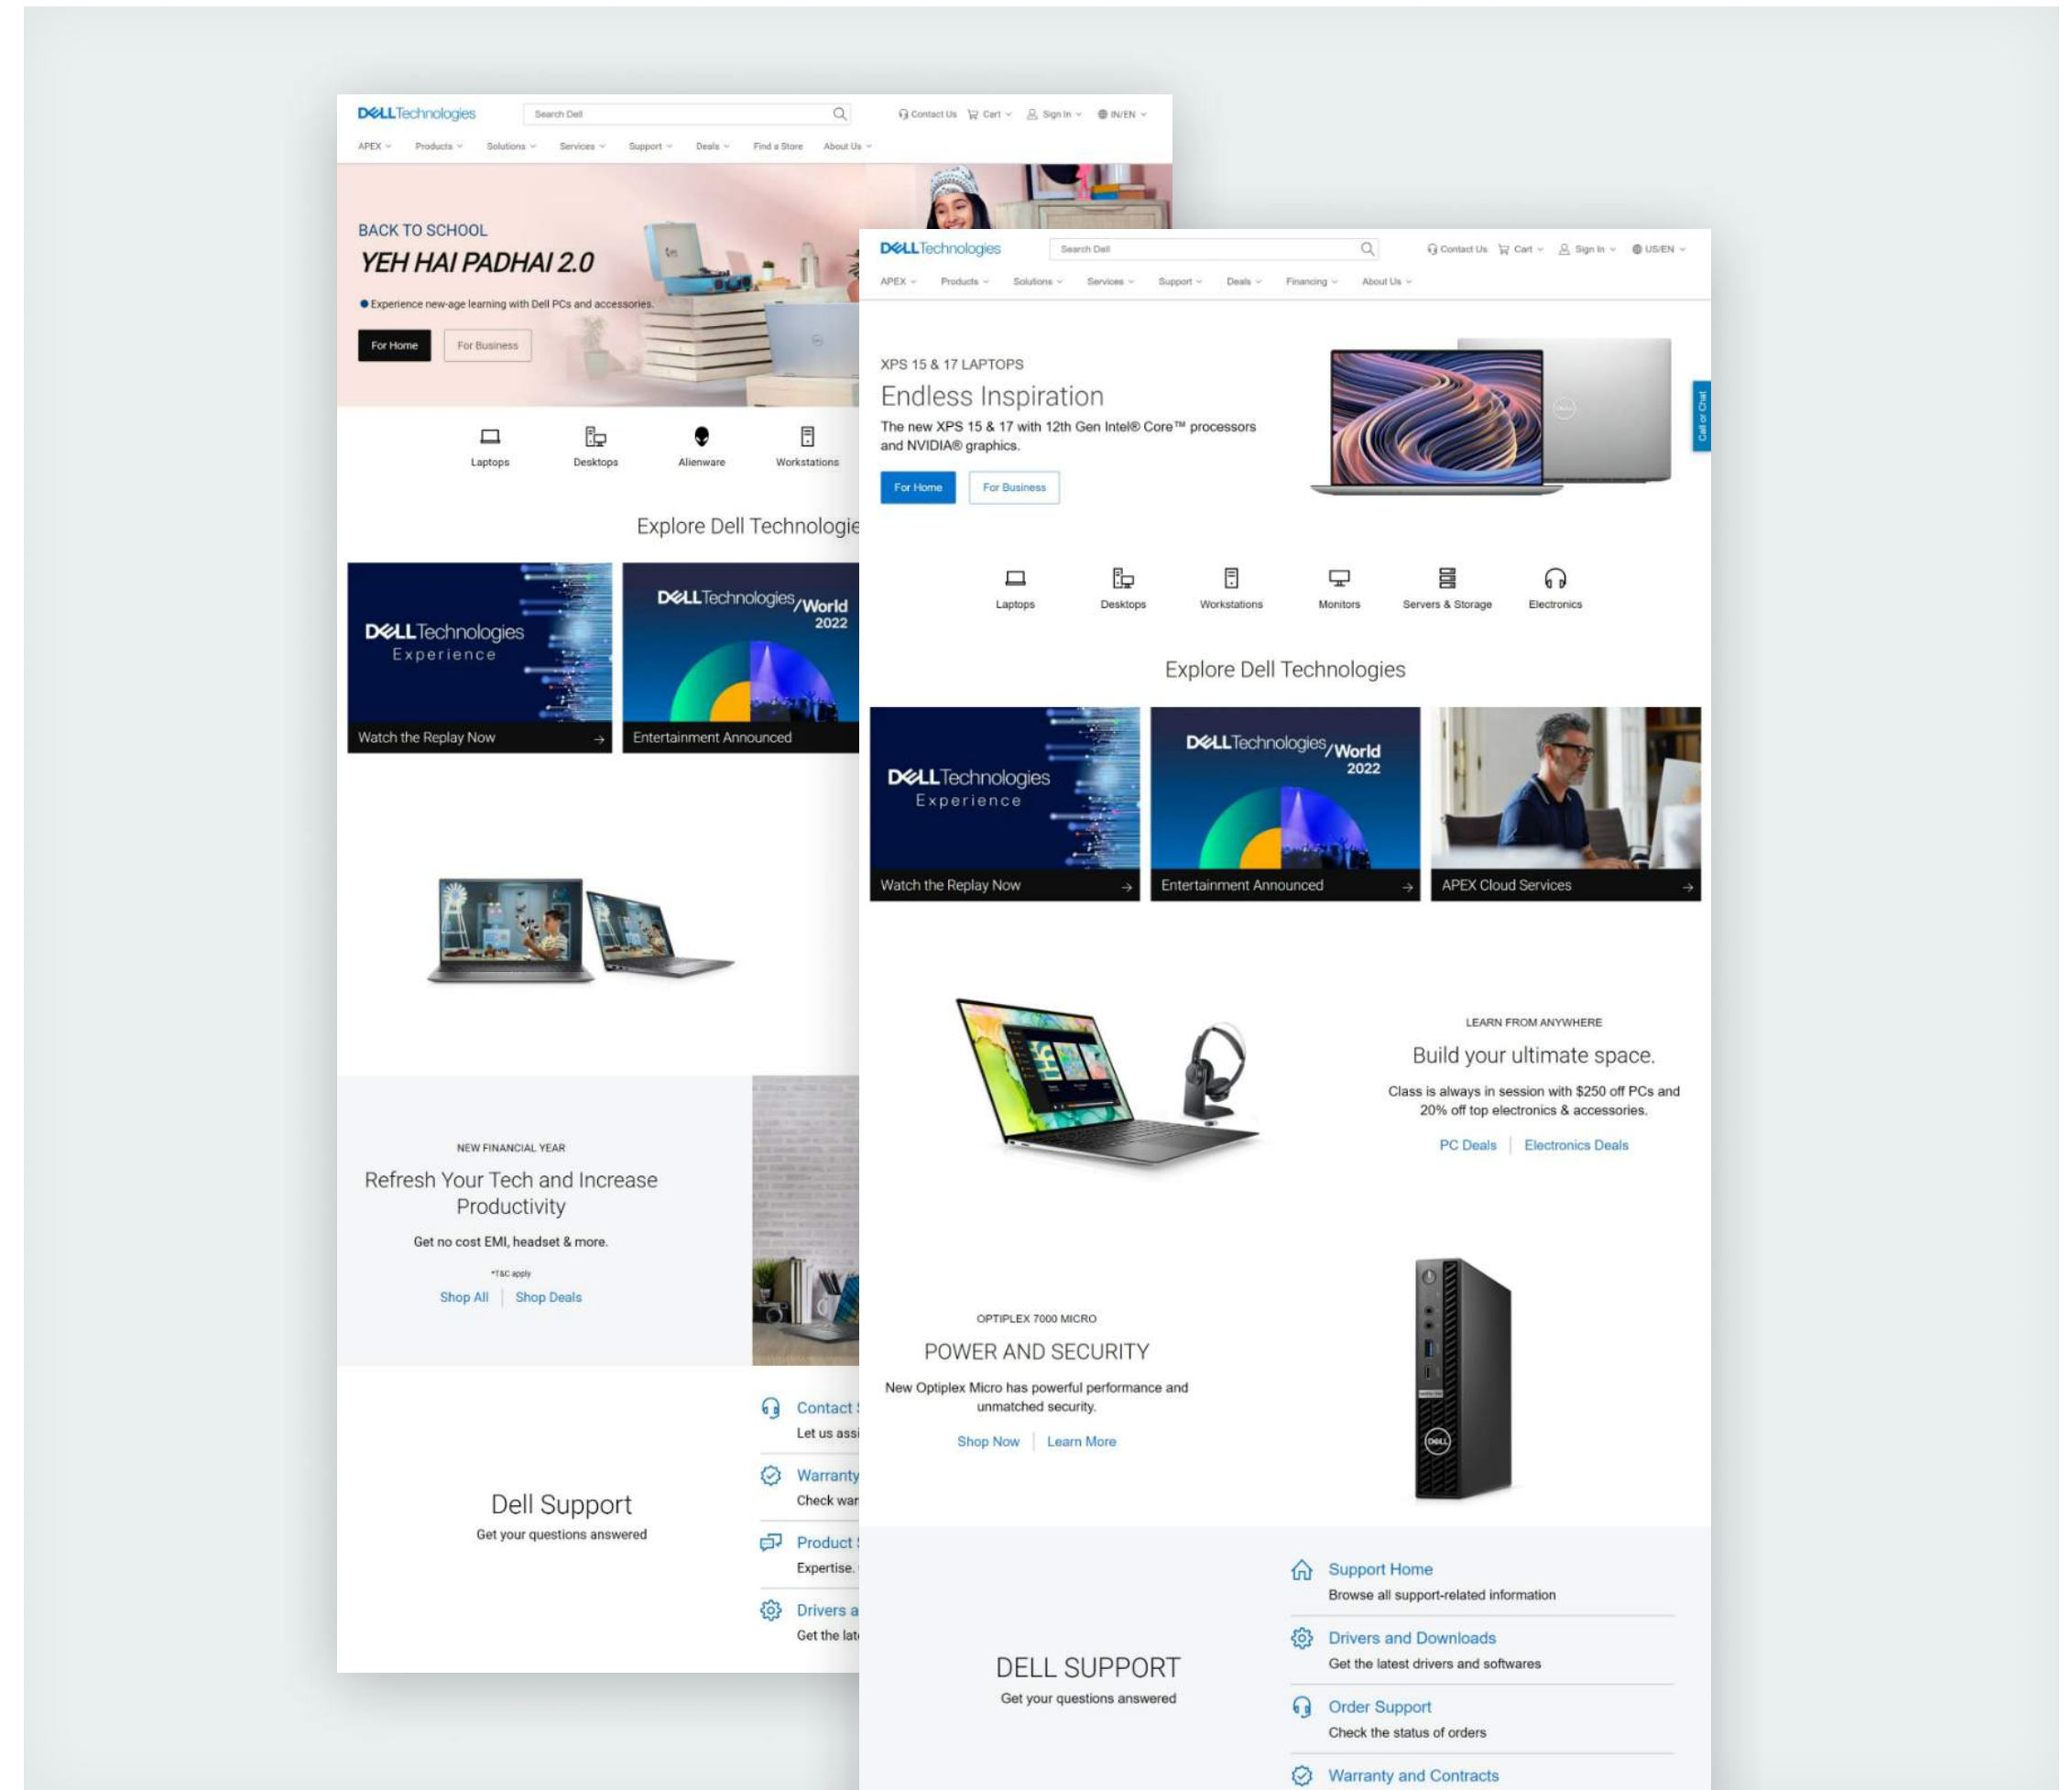

Agenda

What has been done so far..

- Overview & Secondary Research
- Primary Research
- Understanding Pain Points
- Problem Prioritization
- Ideation & Prototyping
- Next Steps & Learnings

Project Brief

To understand a **gaming user's experience** and **requirements** when purchasing a gaming product online, to help them find **recommended gaming products more efficiently** on the homepage.

Project Timeline

March

Discovery

- Homepage exploration
- Heuristic Analysis
- **Competitive Analysis**
- **Market Research**
- Data Analysis

April

Discovery

- Script Creation
- **Moderated User Interview**
- **Affinity Mapping**
- **Empathy Mapping**
- **User Types**
- **Problem Prioritization**

May

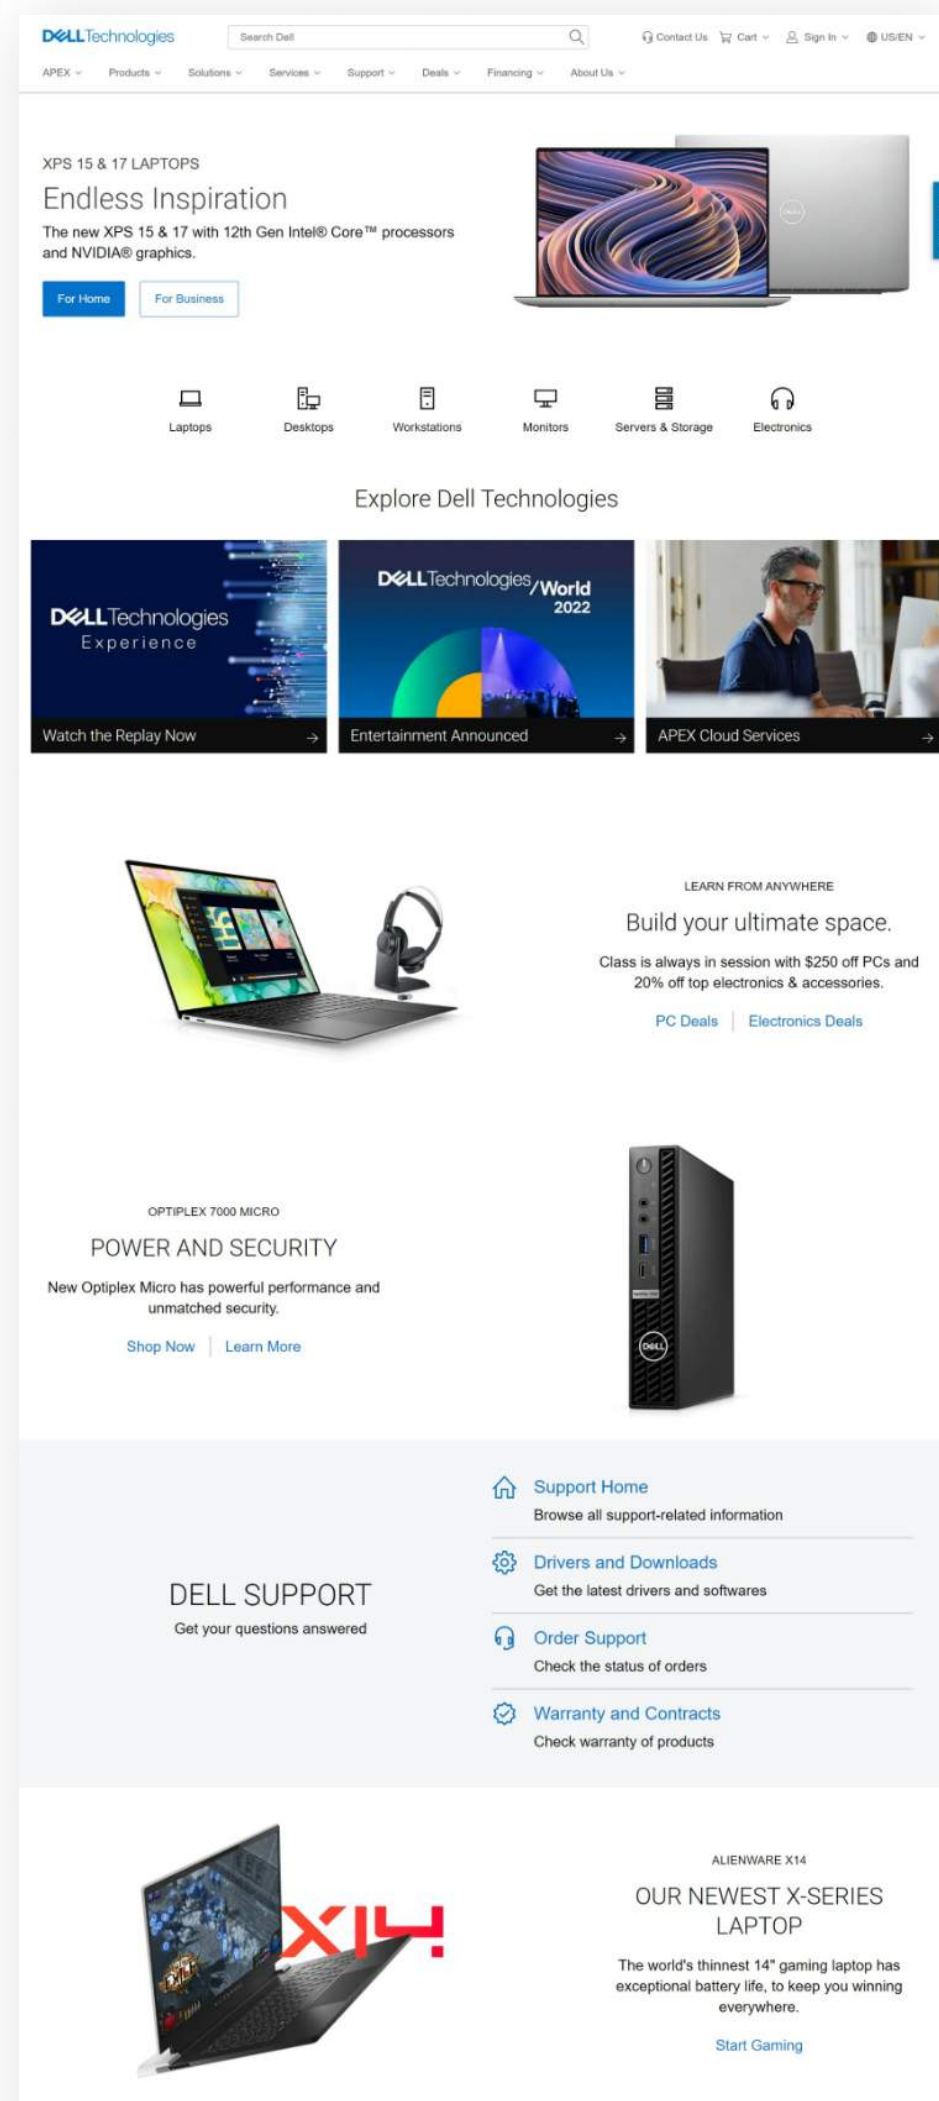

Framing

- **Ideation & Concept generation**
- **Ideation Prioritization**
- **Lo-fi Prototyping**
- Hi-fi Prototyping
- User testing

Current Cold State

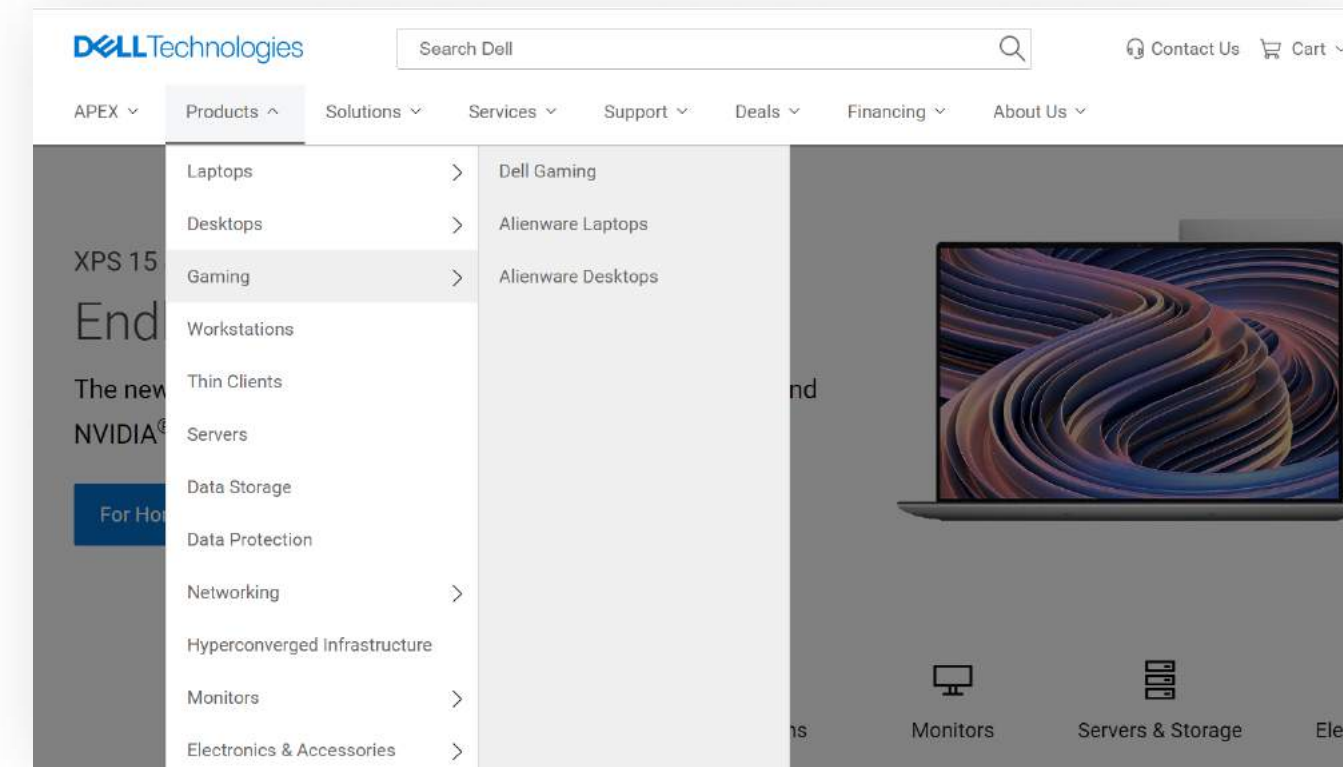

Current Homepage

The current homepage for a cold state user

The two ways to search for gaming products

#1. Selecting Gaming from product section in Masthead

#2. Scrolling down to the gaming module

Current Warm State for Gamers

The warm state gaming homepage is viewed by gaming users who are returning and have viewed products specific to gaming in the past.

The screenshot shows the Dell Technologies website homepage. At the top, there is a navigation bar with the Dell Technologies logo, a search bar, and links for Contact Us, Cart, Sign In, and US/EN. Below the navigation bar, there are several menu items: APEX, Products, Solutions, Services, Support, Deals, Financing, and About Us. The main content area features a large banner for the Alienware X14 laptop, with the text "ALIENWARE X14 OUR NEWEST X SERIES LAPTOP" and a description: "The world's thinnest 14" gaming laptop has exceptional battery life, to keep you winning everywhere." A "Shop Now" button is visible. To the right of the laptop is a "Call or Chat" button. Below the banner, there is a navigation bar with icons for Laptops, Desktops, Alienware, Monitors, Gaming Hub, and Accessories. The main content area is divided into three sections: "Top Rated Laptops" with a "Shop Now" button, "More Than Just PCs" with a "Shop Now" button, and "Access Your Perks" with a "Sign In" button. At the bottom, there is a section for the Alienware M15 R7 laptop, with the text "ALIENWARE M15 R7 ALIENWARE'S MOST POWERFUL 15" LAPTOP EVER" and a description: "Introducing up to 170 watts of pure performance power on our latest M Series gaming laptop."

Competitive Analysis

For the Competitive Analysis, Dell.com was compared with 5 competitors, some being direct competitors and some being indirect competitors.

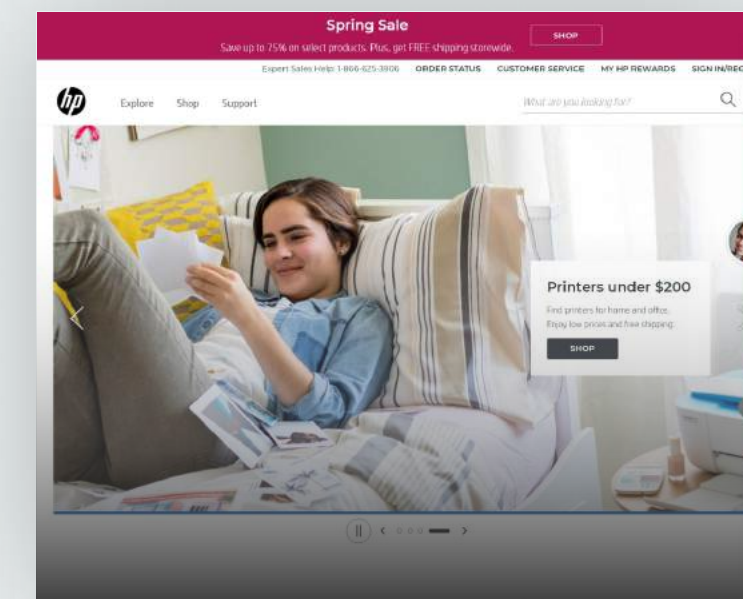

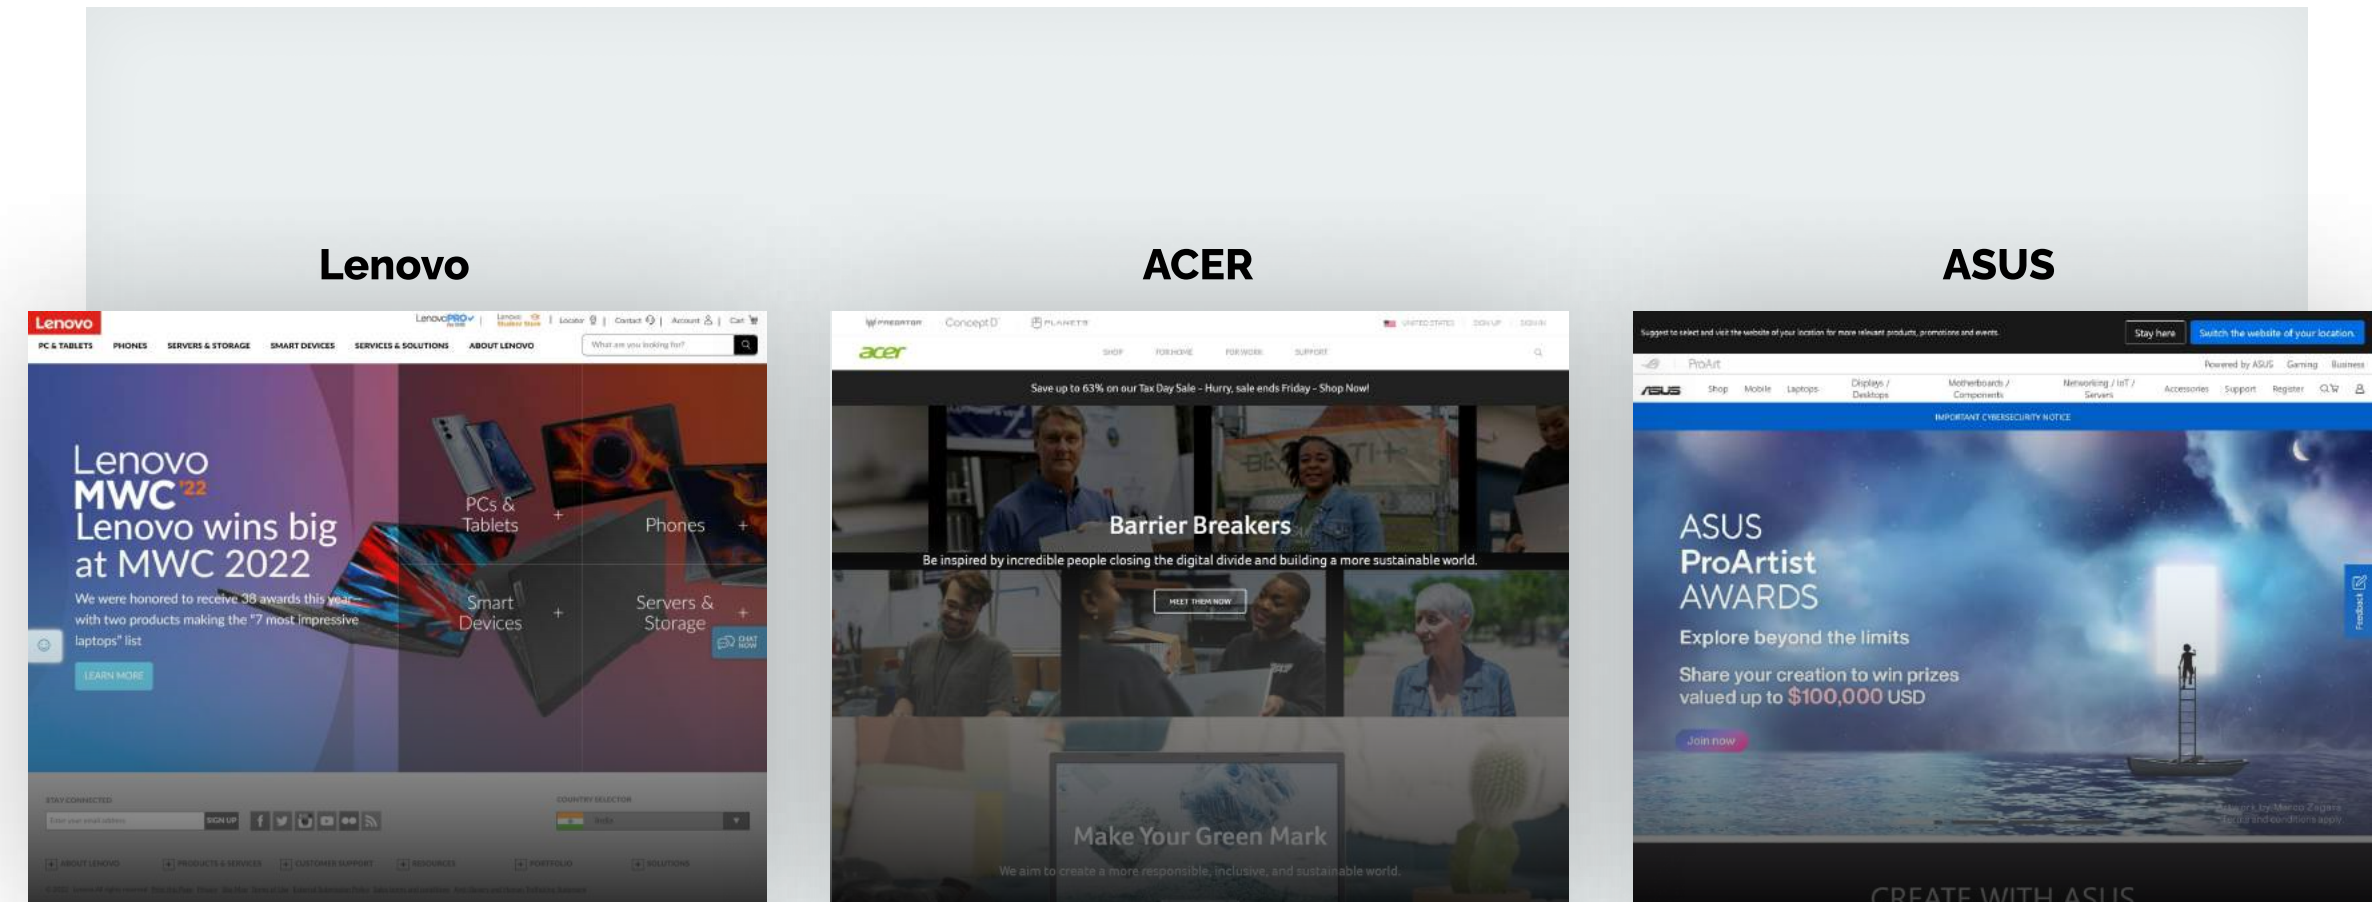

Lenovo

ASUS®

acer

logitech G™

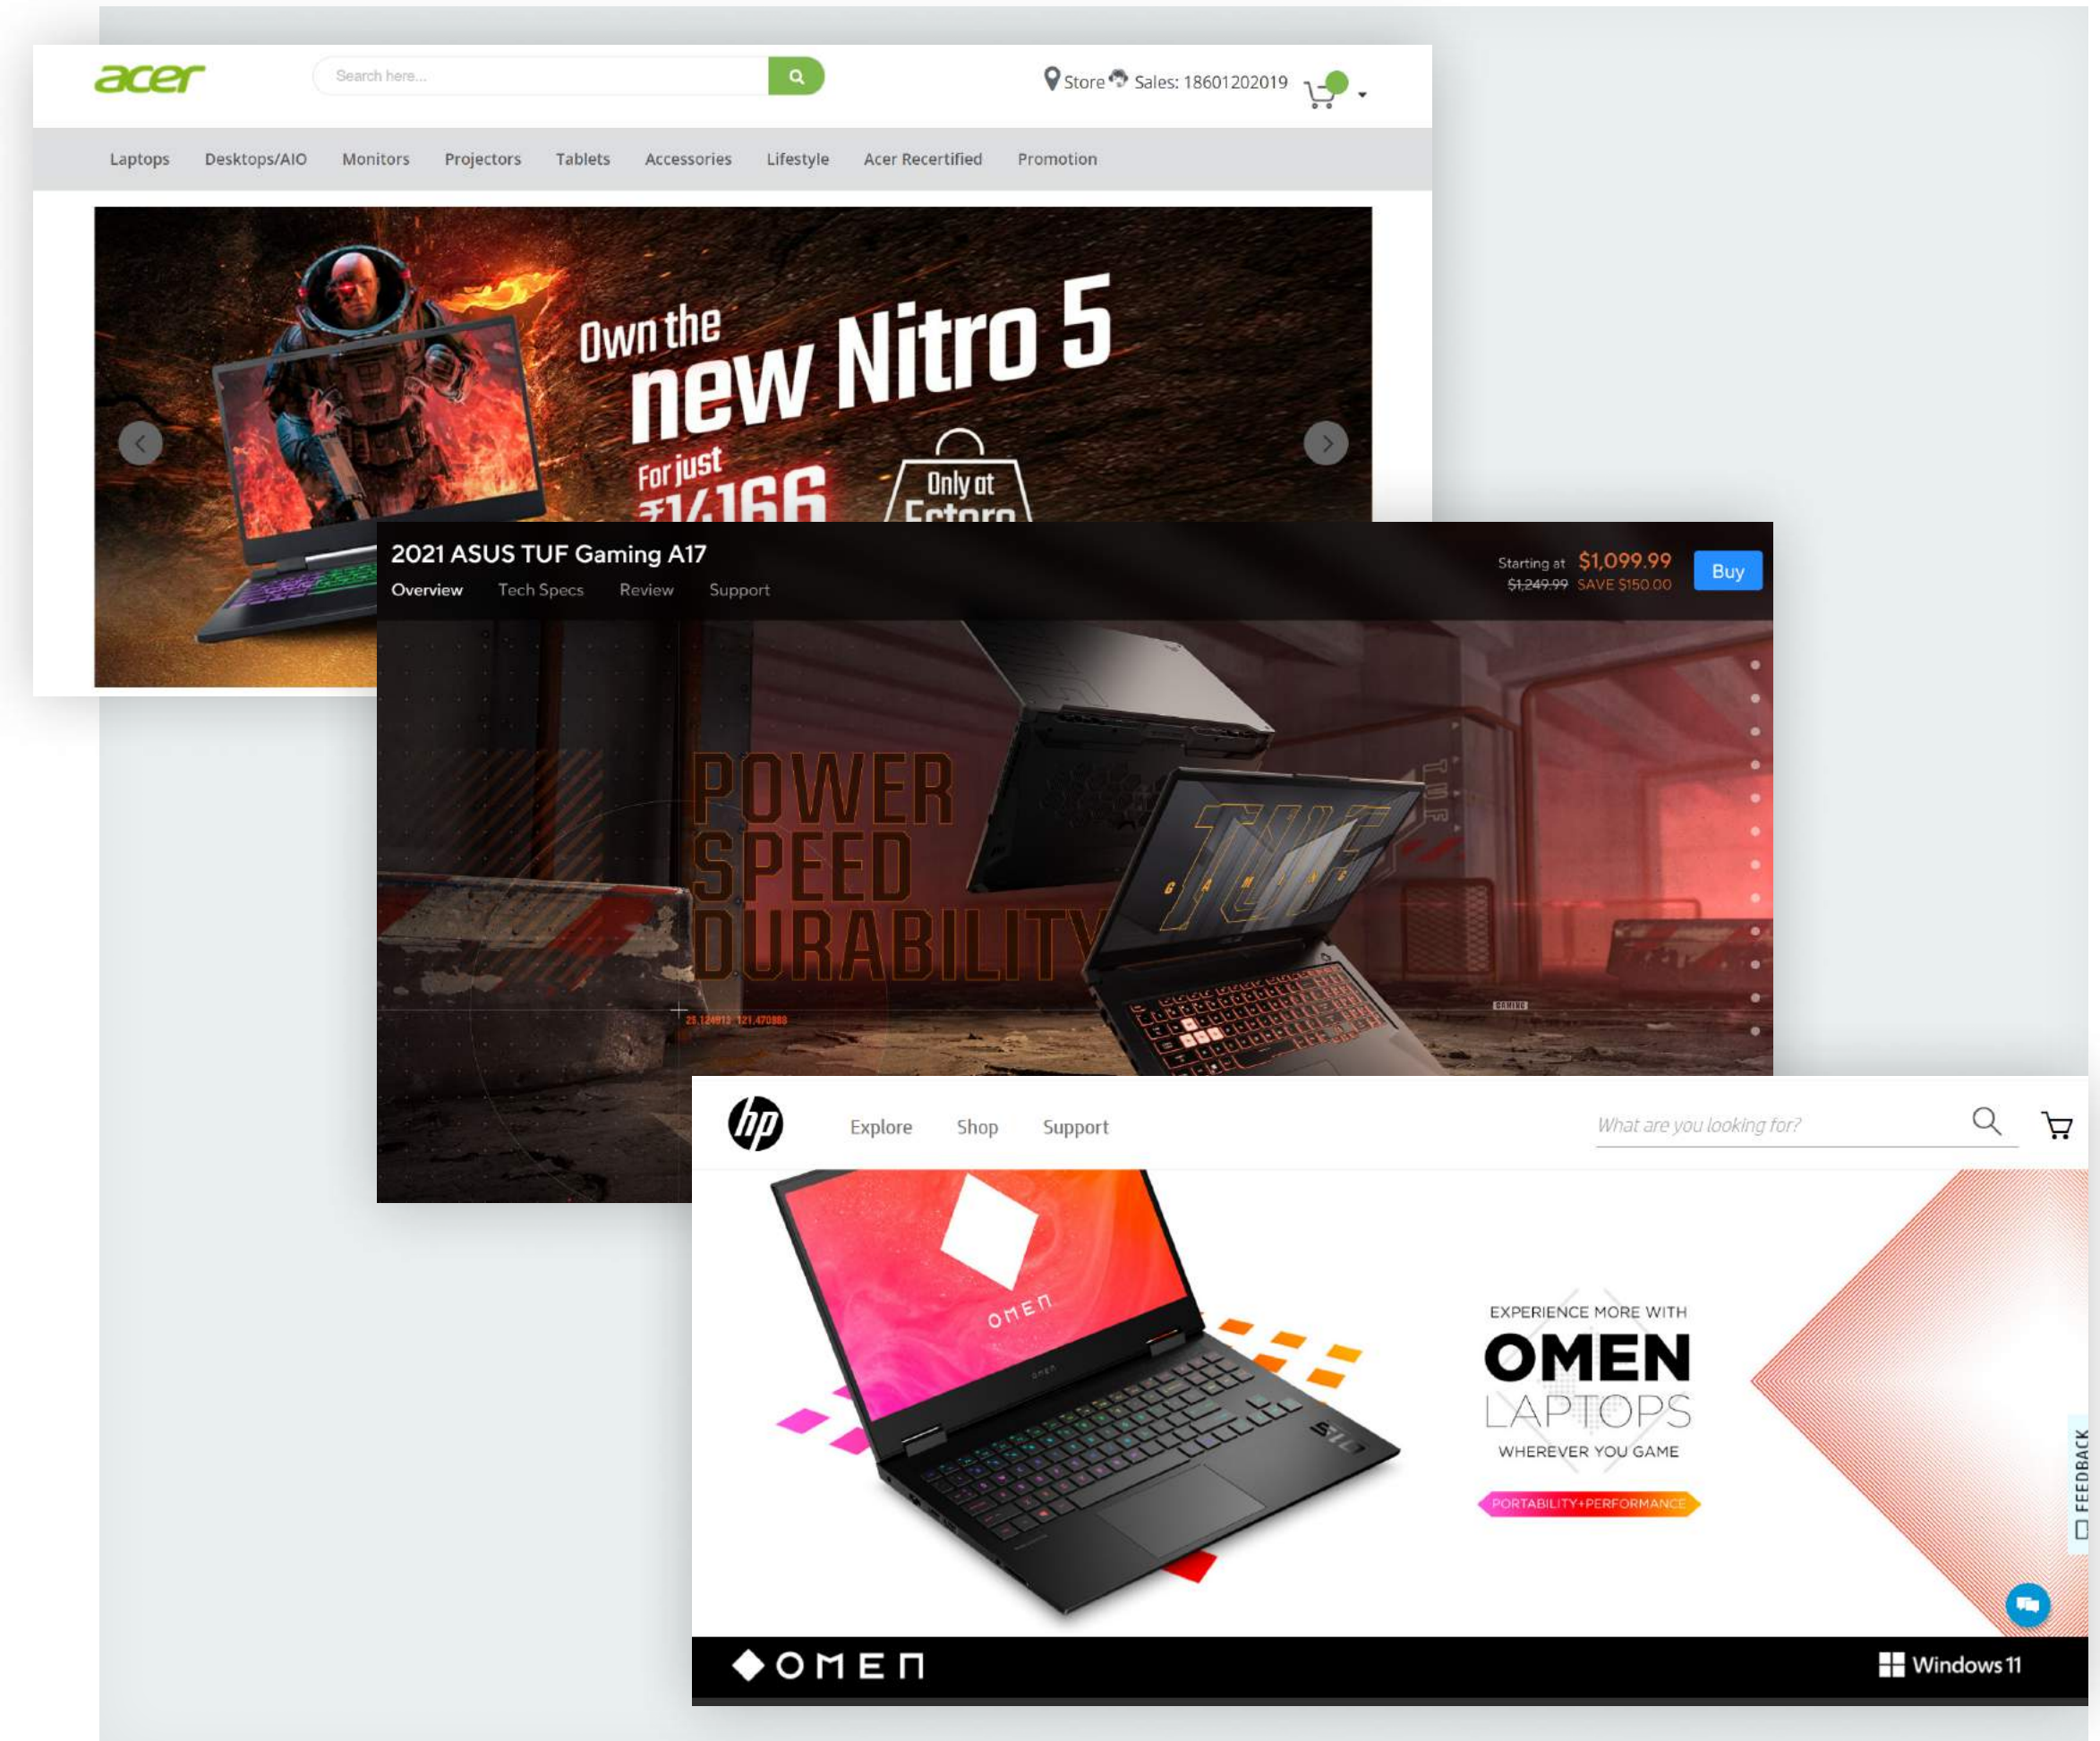

HP

Logitech G

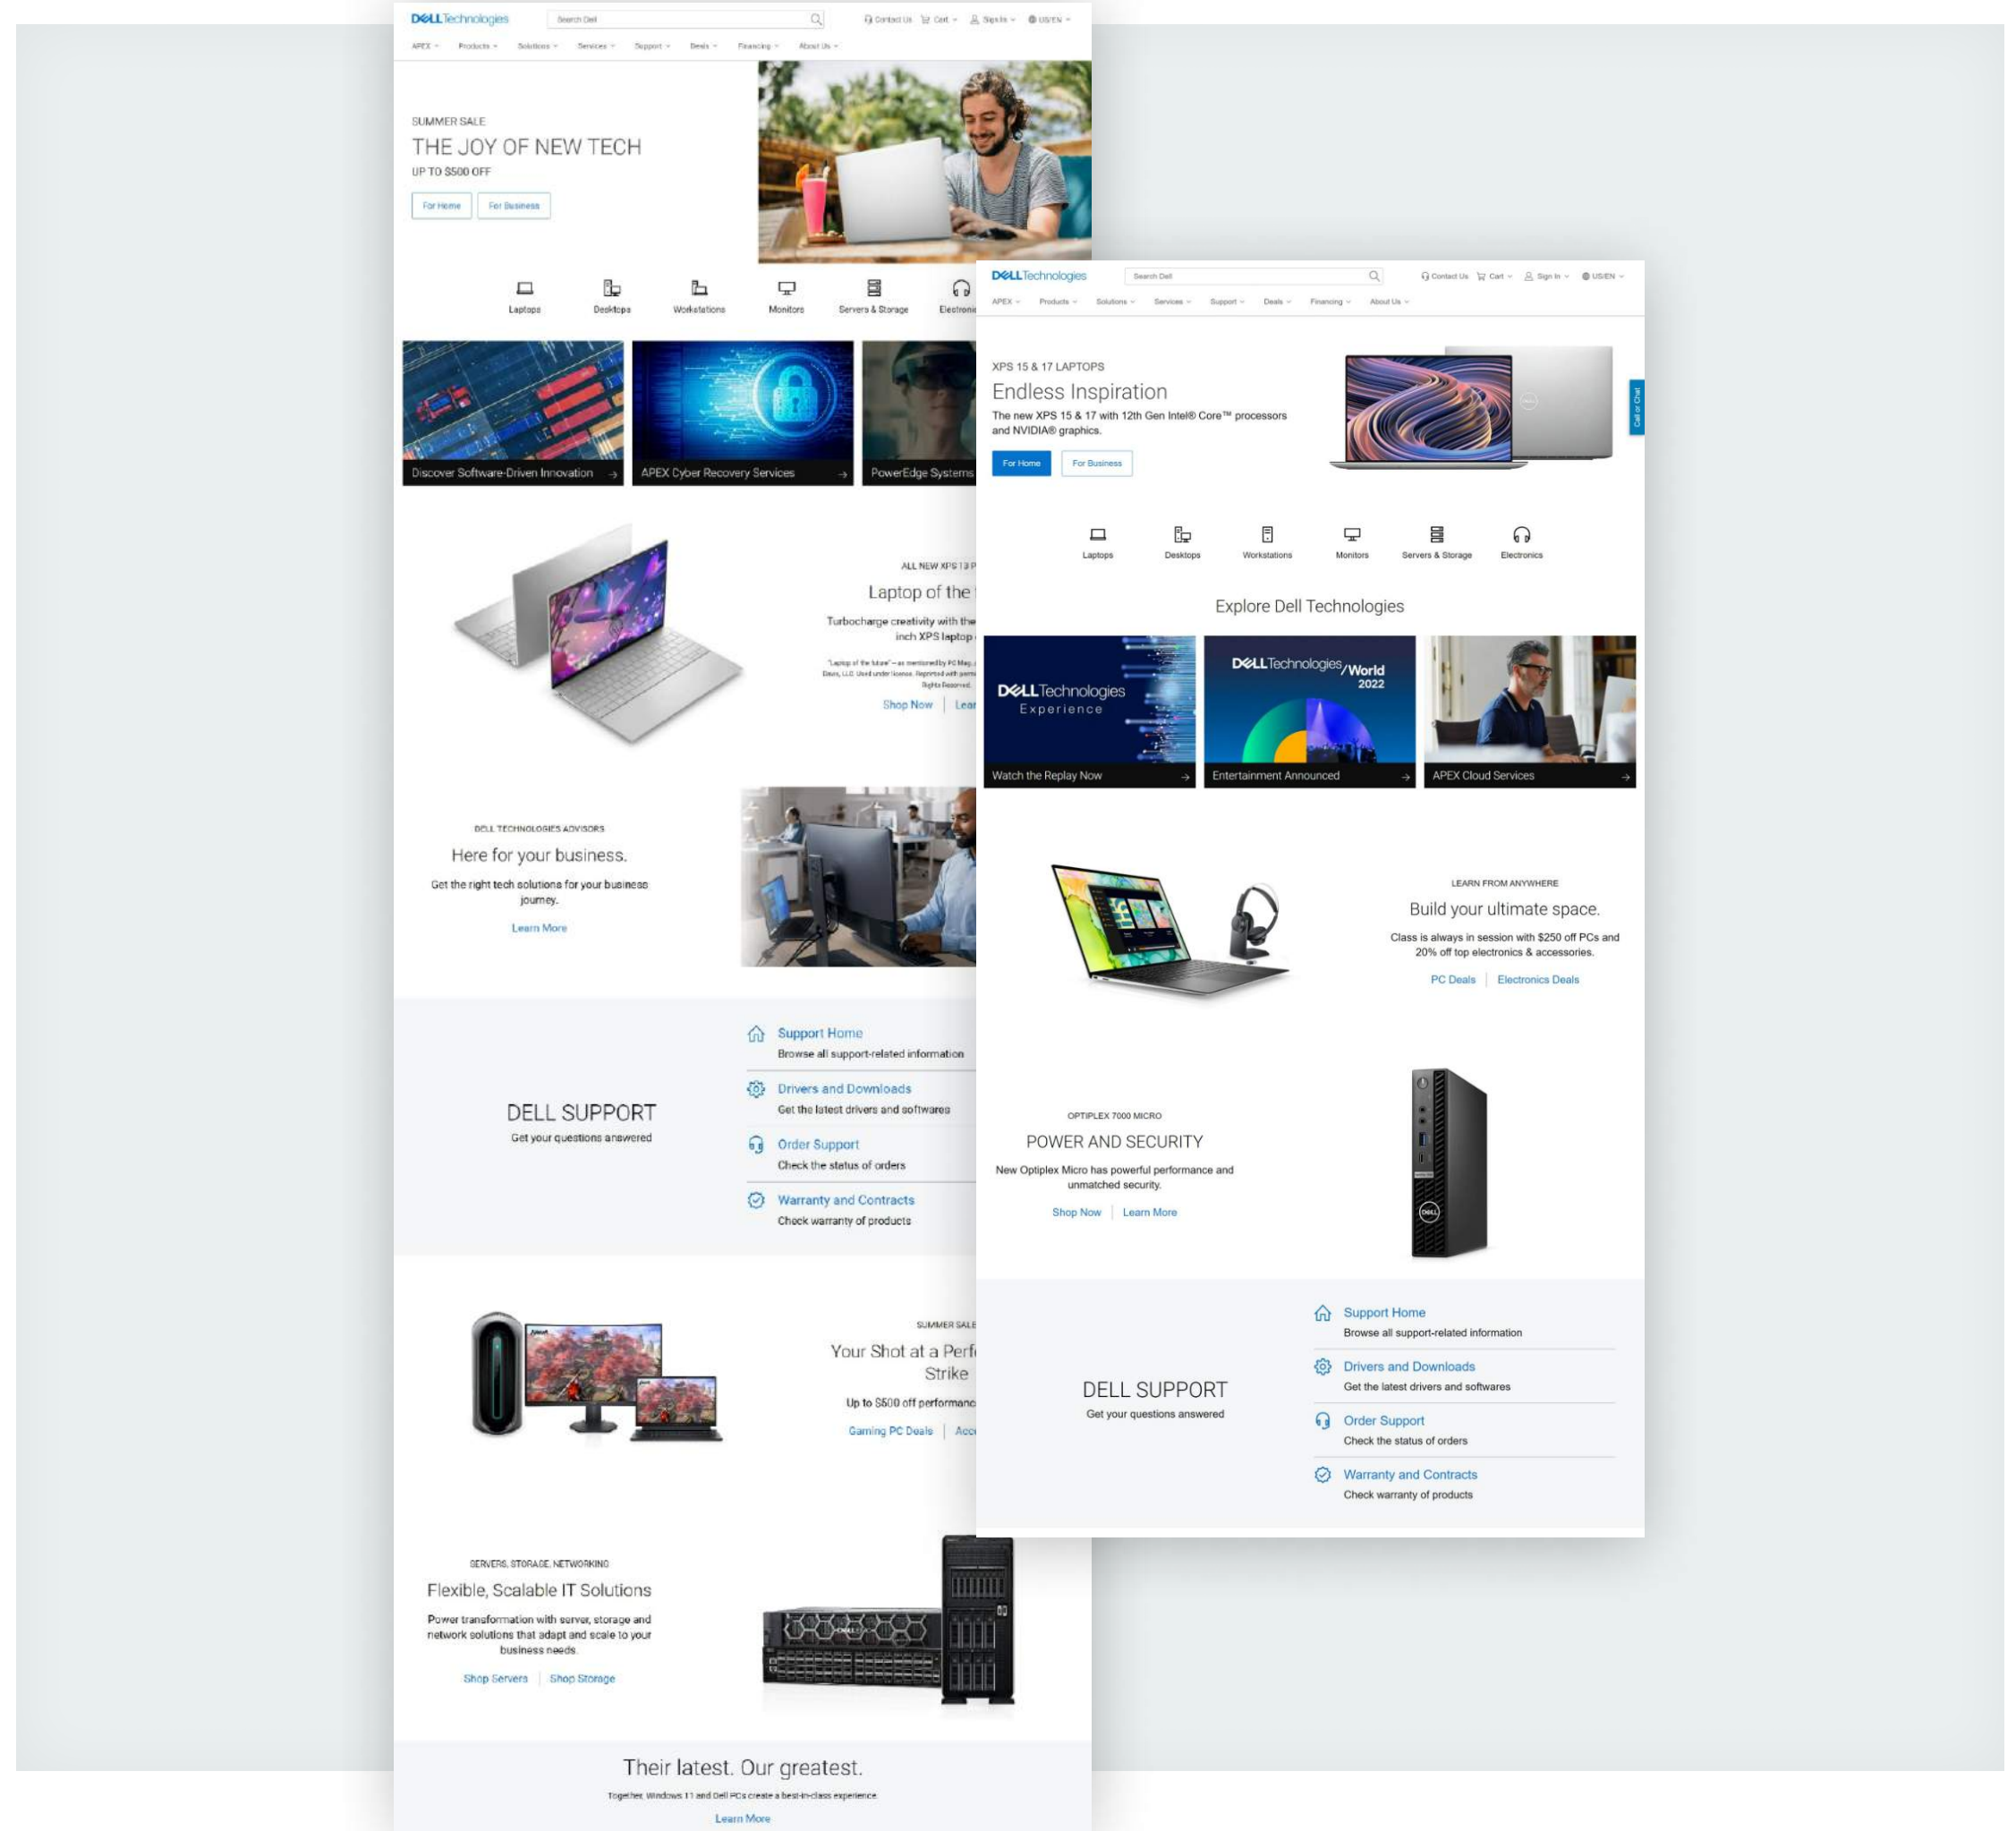

Competitive Analysis

Need	Understanding the market by looking at the importance shown to gamers by competitors
Discover	Establishing types of users and importance shown to them based on real estate provided on homepage
Learn	Understanding importance shown to clear UI elements that help in the experience
Use	Integration of videos on the homepage that excites the users about a product
Retain	Looking at the Design Language and understanding the storytelling aspects of homepage
Stay Informed	Understanding the latest aesthetics users like and expect while purchasing gaming products

Moderated User Interviews

After Data Analysis, Exploratory Moderated Interviews were conducted to understand the overall end-to-end experience of purchasing a gaming product online.

User Comments

“Dell gives me a big impression that it is a corporate supplier.”

“I feel the homepage could be a bit more interactive”

“ I would say the homepage gives off a more professional vibe and not really a gaming vibe “

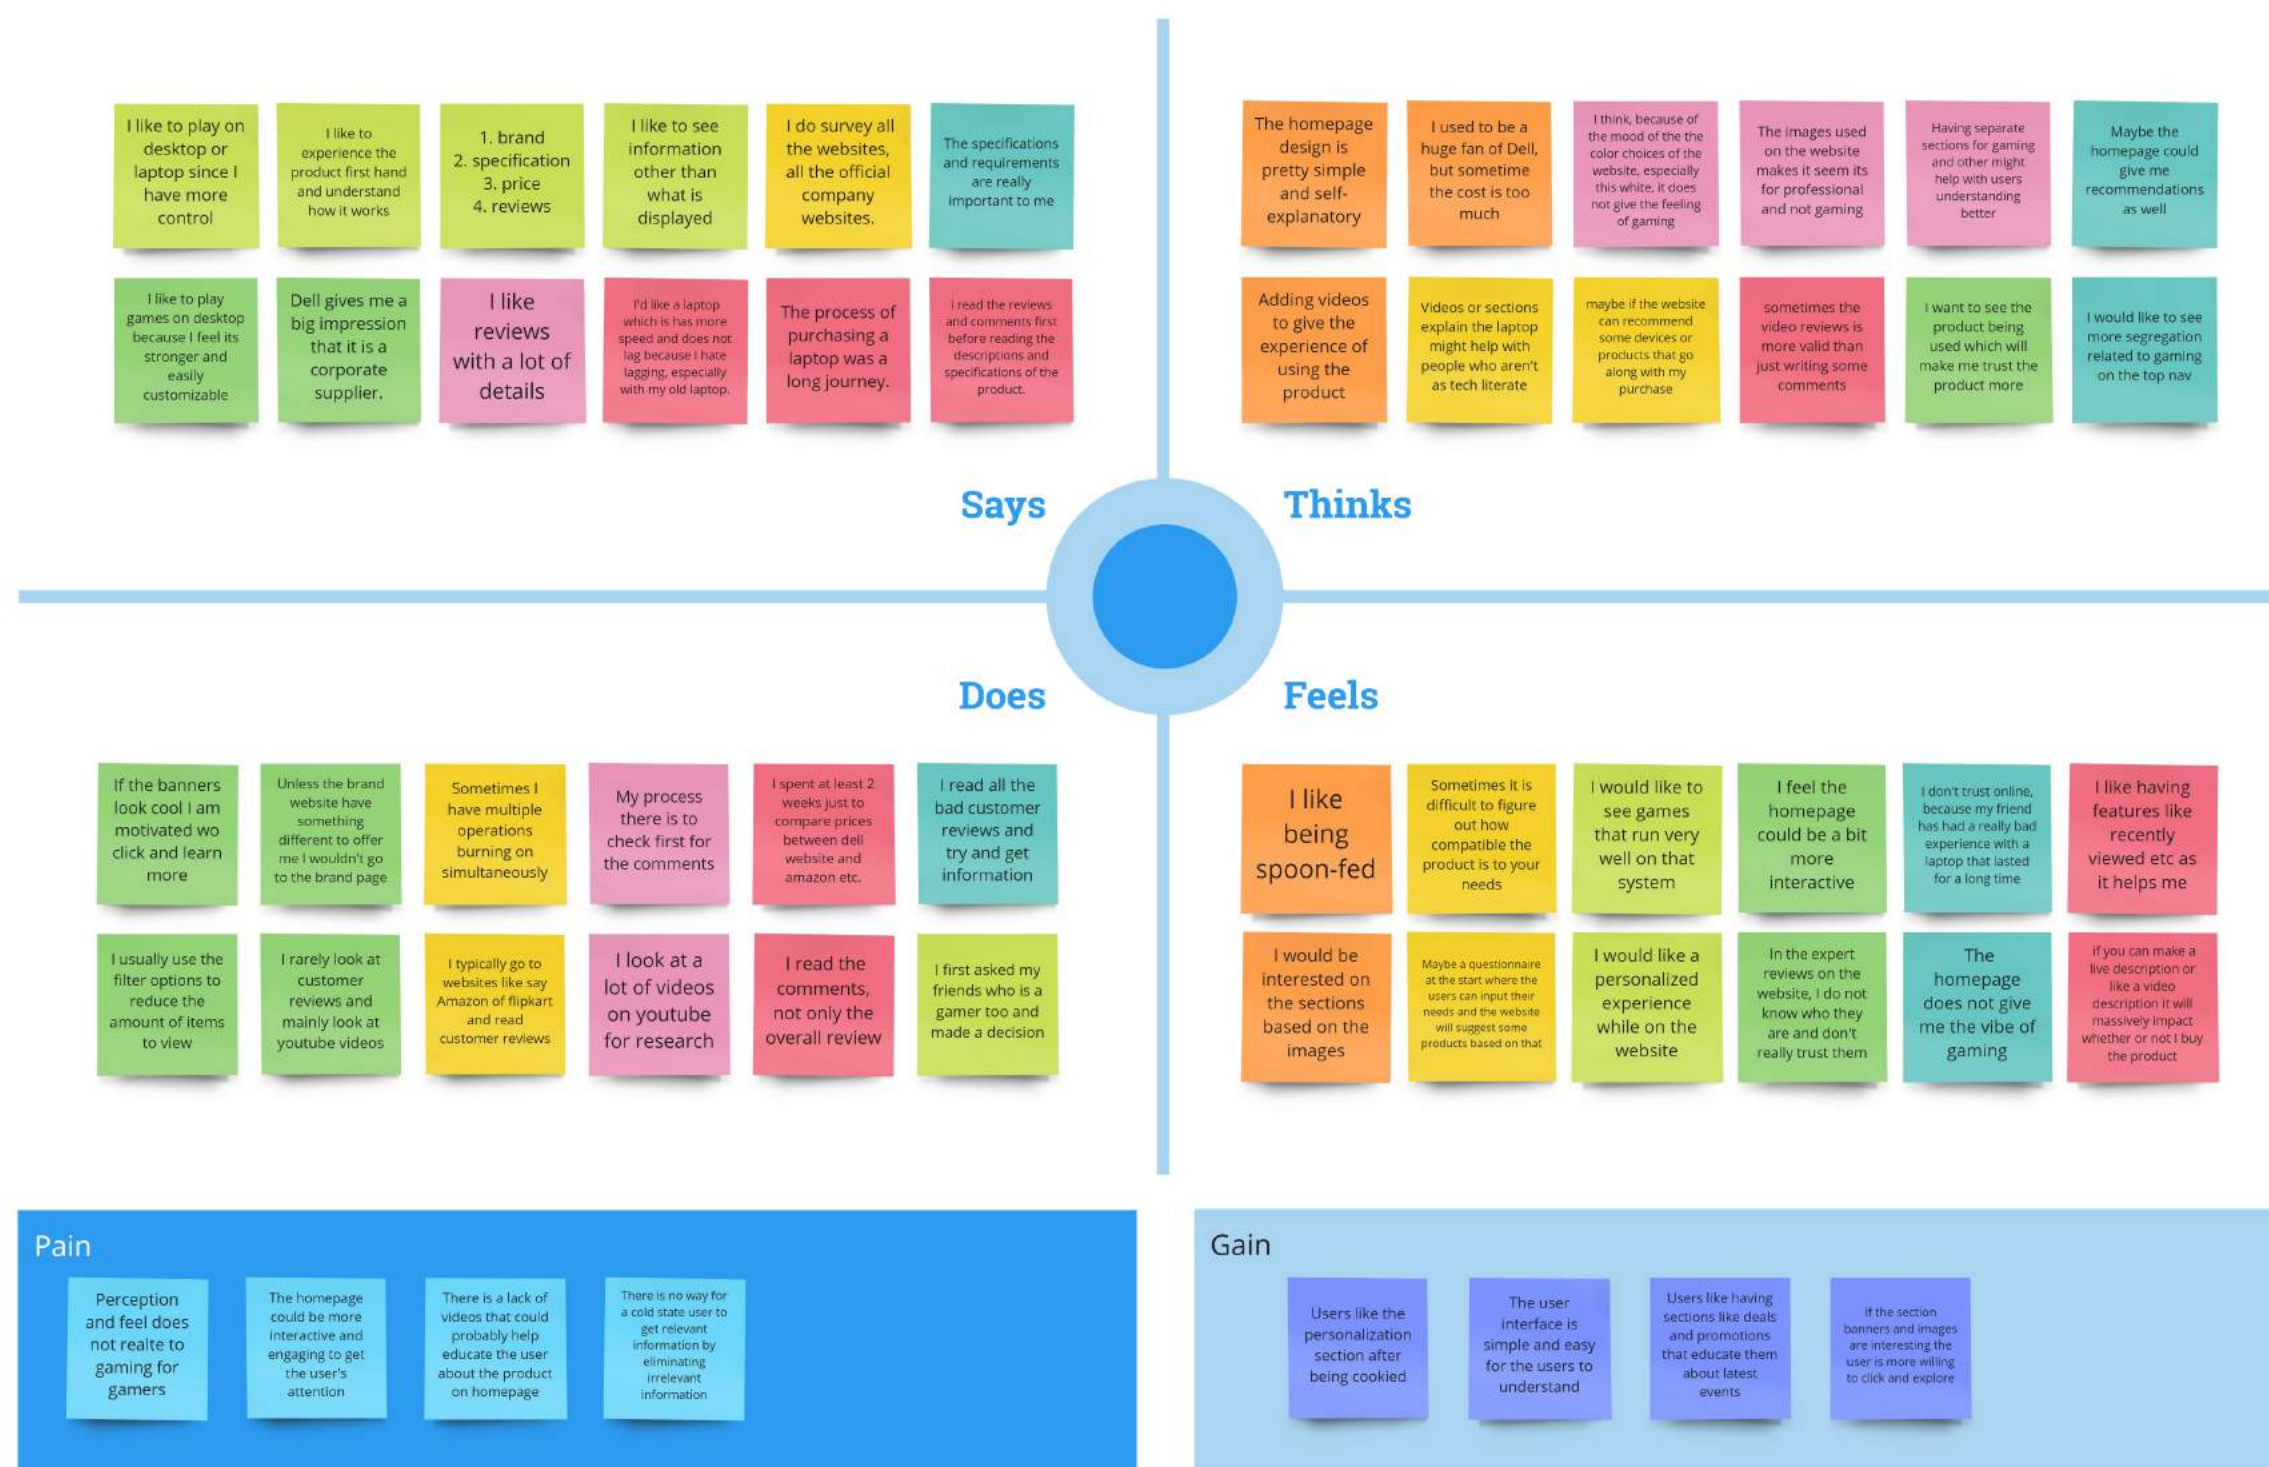

“I would like to see more images or videos of people gaming or gaming products so that I understand better.”

“would like an option to select gaming as an option, so that you see only gaming products”

“incorporation of a dark theme or characters from games makes it better for gaming”

Empathy Map

Using and combining the insights from the moderated interviews, an empathy map was created.

Gain

- Users liked and want **more of personalized features** on the homepage.
- The UI was **simple and easy** for the users to understand..
- Users Liked how there was a specific section on the homepage for **customer support**.

Pain

- The perception and feel of the homepage **does not relate to gaming users**.
- The homepage **lacked interaction** to make it more engaging for the user.
- There is a **lack of videos**, be it promotional or product oriented.
- There is no way a **cold state** user can **personalize** the homepage and search to thier type of user needs/products.

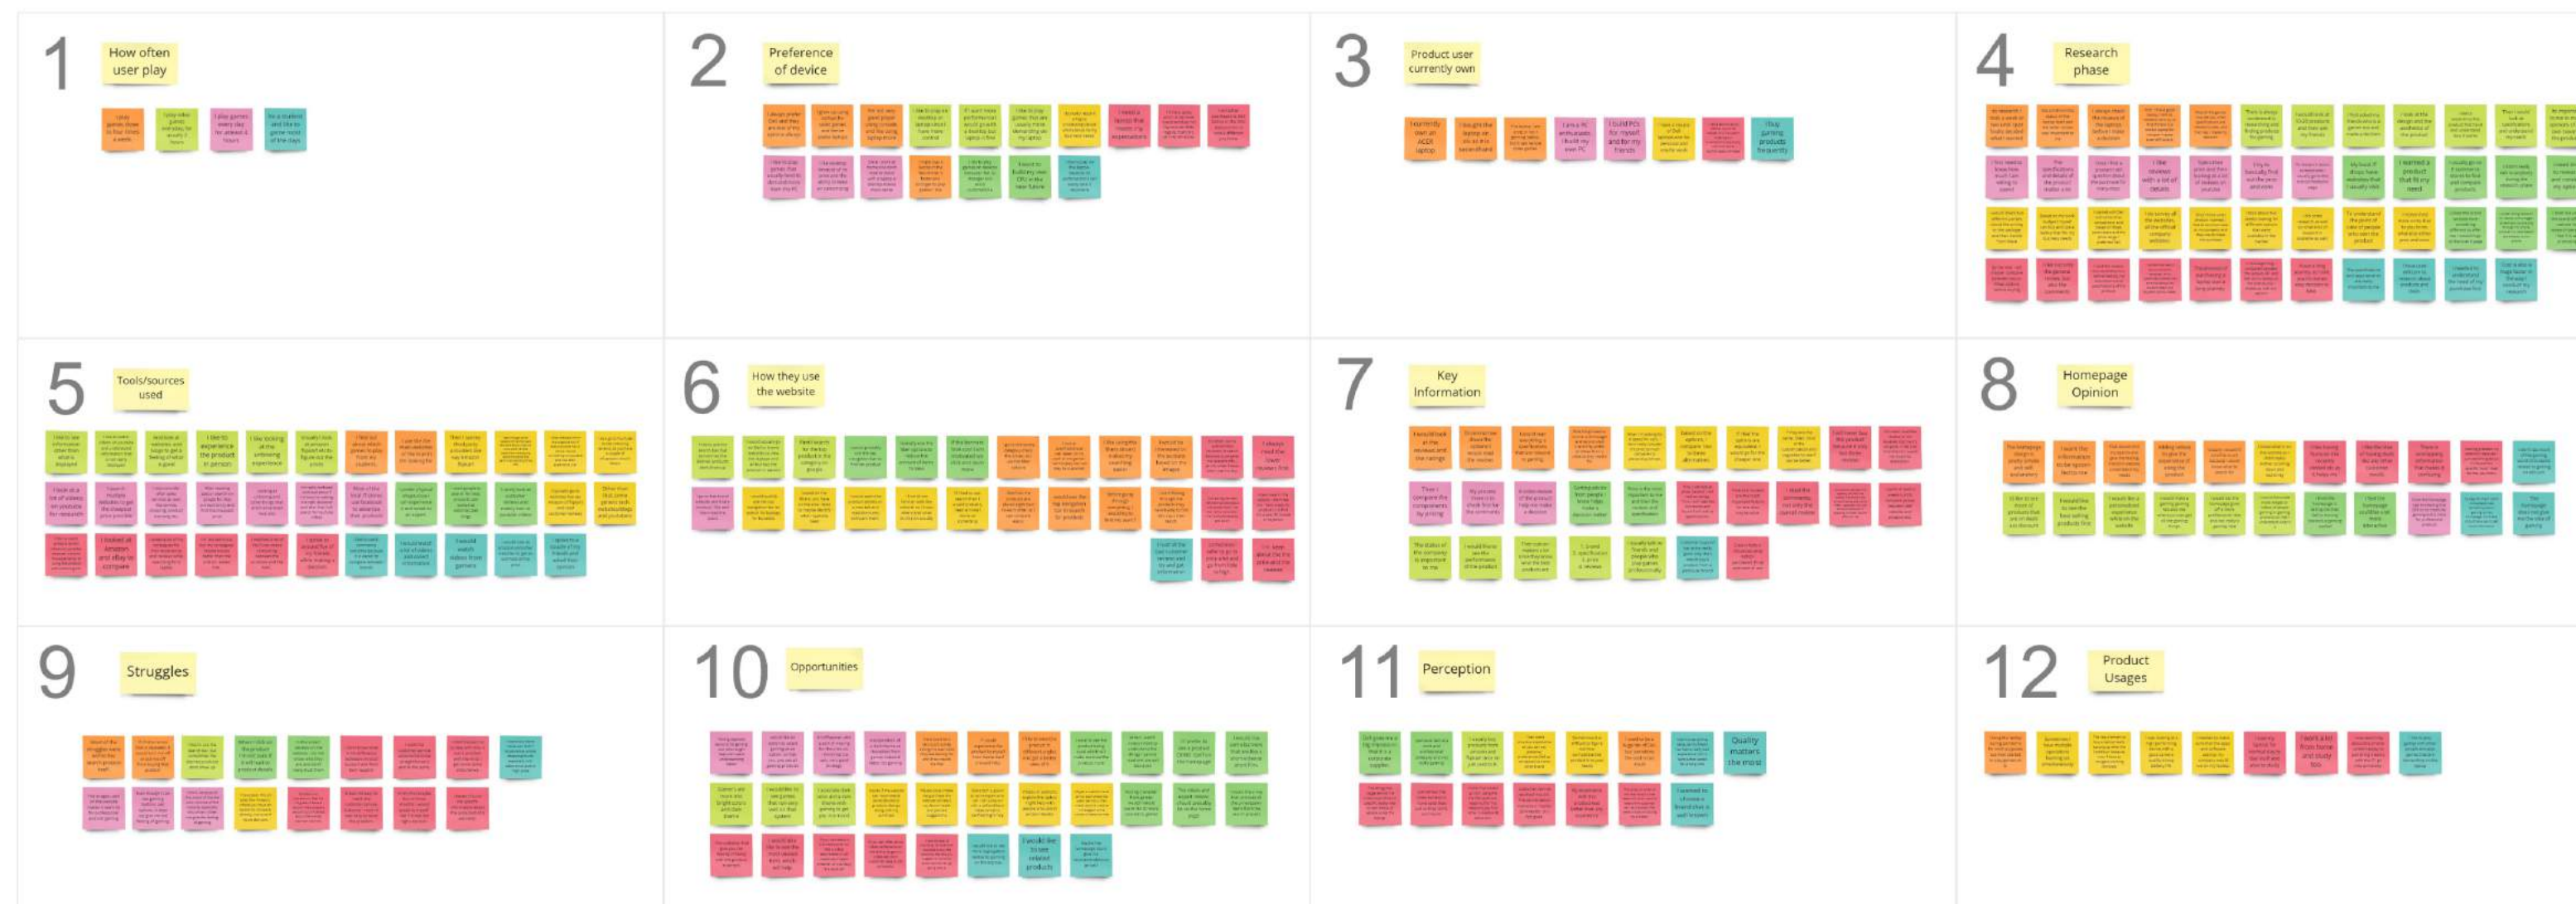

Each color represents one user*

Affinity Mapping

- All the users spend a **lot of time researching** about the product, usually asking **friends** and watching **youtube video** reviews
- **3 out of 7** users wanted to see more **videos** and **banners** that pop out and make them excited.

- **4 out of 7** users percieve the homepage to be **less targetted to gaming**, and more to Home and Business users
- All the users **valued videos more** since they get extra information and a glimpse of what it's like to own the product

- **6 out of 7** users showed desire for the homepage to be **more personalised** to their needs and not see unneccessary information

Topics

- | | |
|----------------------|---------------------|
| 1. Time spent Gaming | 7. Key Information |
| 2. Device Preference | 8. Homepage Opinion |
| 3. Current Product | 9. Struggles |
| 4. Initial Research | 10. Opportunities |
| 5. Tools/Sources | 11. Perception |
| 6. Website Usage | 12. Product Usage |

User Persona

Using the Affinity mapping, we were able to understand what an average gaming user wants and comes to expect while purchasing a product online.

Adam Handler

Age : 29
Occupation : IT Consultant
Location : London, UK
User Type : Recreational Gamer

Bio :
I am a 29 year old IT consultant working long hours. In my free time I love to play video games, especially online multiplayer games with my friends. I have slowly started noticing that my current laptop cannot handle the latest games and I am hence looking to purchase a new gaming laptop, but not sure which.

Gaming Knowledge

Social Media

Joel Daniels

Age : 22
Occupation : Pro Gamer
Location : Goa, India
User Type : Hardcore Gamer

Bio :
I am a 22 year old professional Gamer, I stream my gameplay everyday on streaming sites like twitch. I frequently take part in gaming competitions and need hardware that is up to date for optimal gameplay and performance. I am frequently approached by friends needing advice.

Gaming Knowledge

Social Media

Summing it up

To sum it up the discovery phase are the major findings from each.

Gaming is a **growing sector**, with a lot of **opportunity**

Perception and attractiveness play a huge role in motivation to buy

Users want more **interaction** and **engagement** with homepage

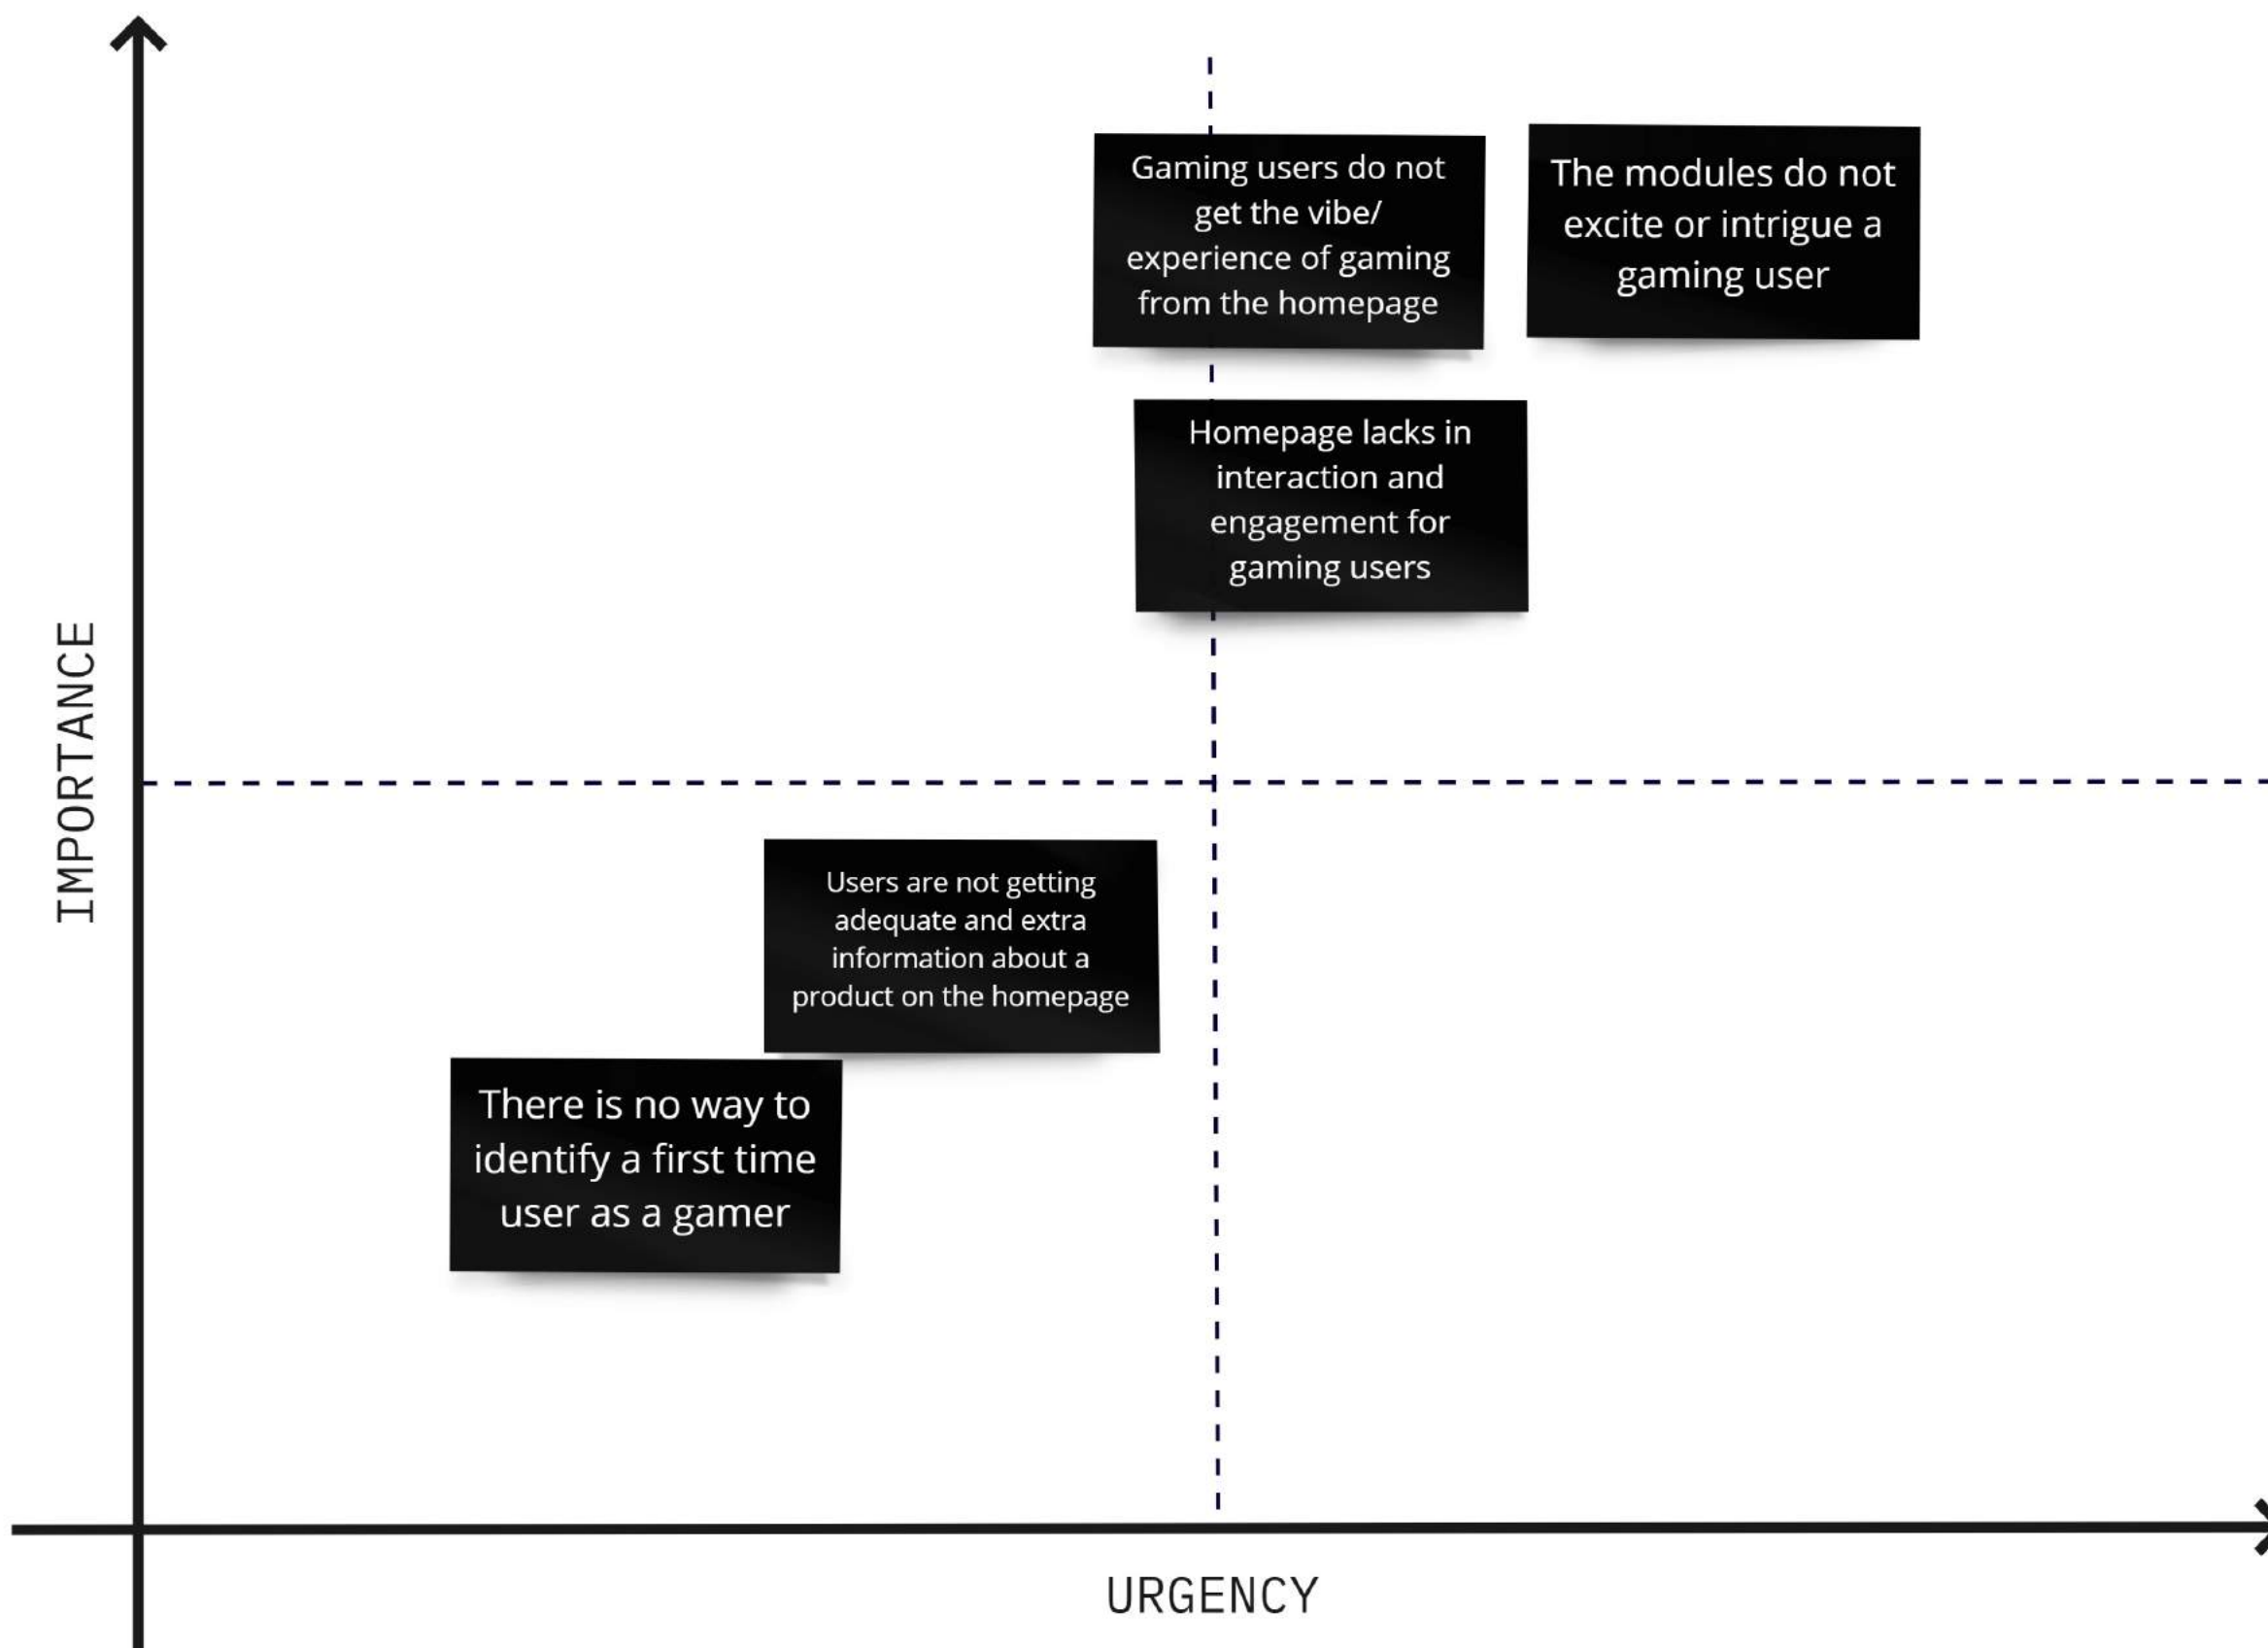

Videos are **highly regarded** by the users during the purchasing experience

Users want a way to **relegate unwanted information** in a means to **personalize**

Problem Prioritization

Using the 2x2 method, we were able to prioritize the problems faced by the users on the basis of importance and urgency.

Prioritized Problems

The modules do not **excite or intrigue** a gaming user

Gaming users do not get the **vibe/experience** of gaming from the homepage

Homepage **lacks in interaction** and engagement for gaming users

Solution Areas

After conducting Ideation sessions (Crazy 8 method) with the core Homepage team, we settled on three solutions to take forward and explore.

Solutions

Product Module

The goal is to **rework and revamp the product modules** that showcase the products to fit the perception of gaming.

Video Module

The goal is to **add/incorporate a video module** on the homepage to promote the latest products and **motivate and excite the user**.

Community Module

The goal is to add a **community module** to help **promote the Dell gaming culture and community** by showcasing ways users can join.

Product Module

Concept A

This concept follows the same guidelines as the existing product template but gives the opportunity to use dark mode and play around with textures and patterns

Concept B

This concept uses dynamic shapes to bring focus on the product and stand out. This concept should also help add variation and asymmetry to each product module to keep it engaging for the user.

Video Module

Concept A

In this concept of the video module, A looped video of the product will autoplay in the background with the name of the product, description and CTA will be placed on the bottom left.

Video Module

Concept B

In this concept of the video module, A looped video of the product will autoplay in the background with the name of the product, description and CTA will be placed below the video. Along with the description, a picture of the product in name will we placed below the video so that the user has even more context.

Community Module

Concept A

This concept educates the user about the Dell and alienware gaming community and provides the opportunity for the user to follow updates on multiple social platforms

Concept B

Along with educating the user about the Dell and Alienware gaming community and providing different social platforms, this concept incorporates a background image that would help evoke the feeling of community

Whats Next?

- High Fidelity Prototyping (In Progress)
- AB Testing

Learnings and Gratitude

Team work

One of the biggest takeaways for me was to work in a proper team that function on a global level. Experiencing how my colleagues work and getting their feedback on my work was invaluable. Higher engagement led to higher productivity.

Appreciation

I want to thank each and everyone who have helped me throuhgout my journey as an intern at Dell. Especially Harish, Amanda & Vikas and last but not the least the support buddies.

Thank You!

Would love to hear your feedback and answer any questions.
